

Incapacity Questions

How were you functioning at work prior to stopping work? For example, how many hours did you work, what tasks were you able to do, what was your efficiency like, etc?

What date were you incapacitated from (i.e., not able to work)?

Since the date of incapacity, have you been in any work?

If you have worked since the sexual assault/abuse, what was the recent trigger for not being able to work?

What are the effects of the covered injuries [i.e., the diagnoses you have] on your current functioning? For example, symptoms of PTSD include poor concentration, poor memory, irritability, fatigue and these might affect everyday activities (e.g., getting out of the house, concentrating on work, completing tasks, dealing with people, etc).

What work is possible?

When do you feel any return to work might be possible?

What supports would have to be in place for you to work?
